

OPCORE DC3

France's expertise at the service of a next-generation data center.

1. INTRODUCTION

The **OPCORE DC3** project, located in Vitry-sur-Seine, reflects the industrial execution capacity of Valtria by Clauger France and the trust that Cap Ingelec places in our teams to manage projects of this magnitude.

This data center, with **10,000 m²** of floor space and **24 MW of computing power**, sets new standards in security, redundancy and energy efficiency.

2. WHY CAP INTELEC CHOSE US

Cap Ingelec chose us for our ability to execute complex industrial projects and for Valtria's renowned professionalism within the Clauger France group.

The effective management of this project, in a highly demanding environment and with tight deadlines, has been a key factor in consolidating their trust.

3. A MARKET IN FULL GROWTH

The data center market continues to expand strongly:

- **+10% annual growth.**
- **100,000 million euros in planned investments.**
- Major players (cloud providers, telecom operators) are looking for reliable and agile partners.

Having projects like this allows us **to promote our development in a sector in full transformation.**

4. TEAM

We have a committed and highly qualified team. The success of OPCORE DC3 is based on the **experience and commitment of our teams**, both in the design phase (network cooling and critical utilities) and in the execution on site.

Our thanks to **Anthony Escomel** (Project Manager) and **Ludovic Chevalier** (Site Manager), as well as to the entire team that has participated in the project.

5. A PROJECT THAT OPENS UP NEW OPPORTUNITIES

In the data center industry, relationships and reputation are key.

A successful project opens the door to new projects, and each achievement reinforces our credibility with future clients.

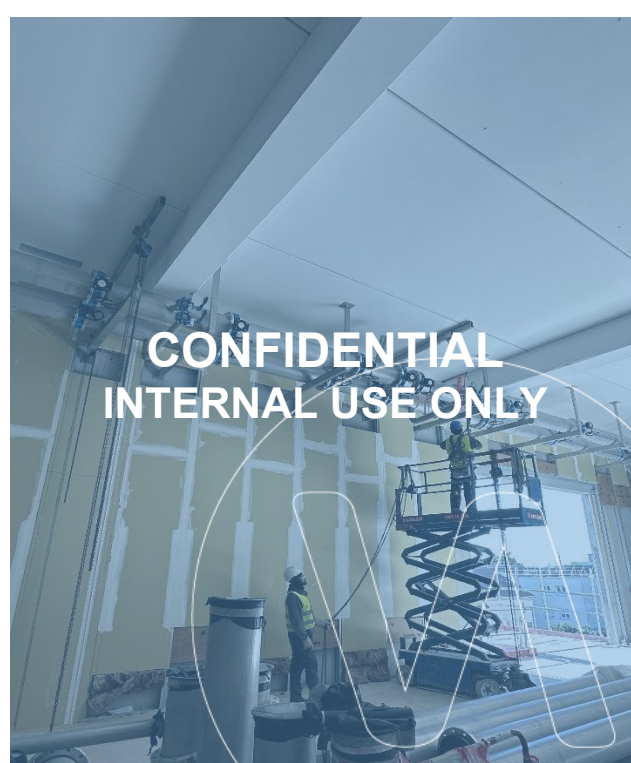

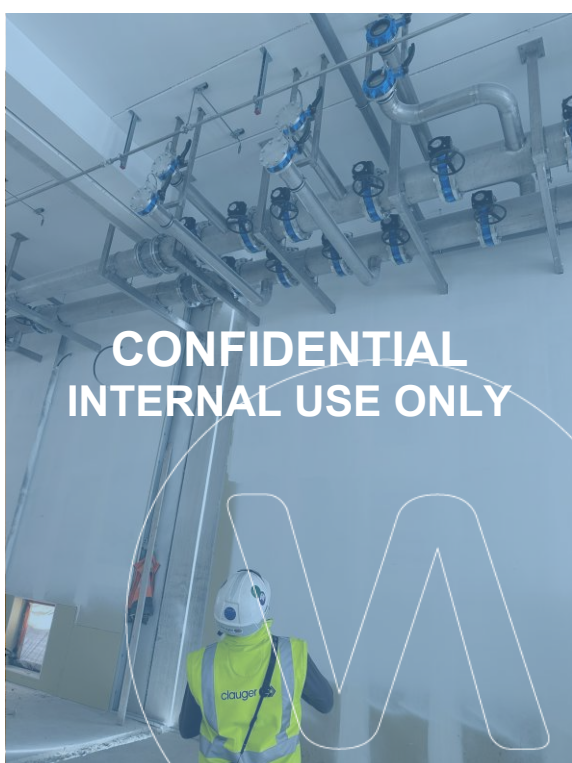

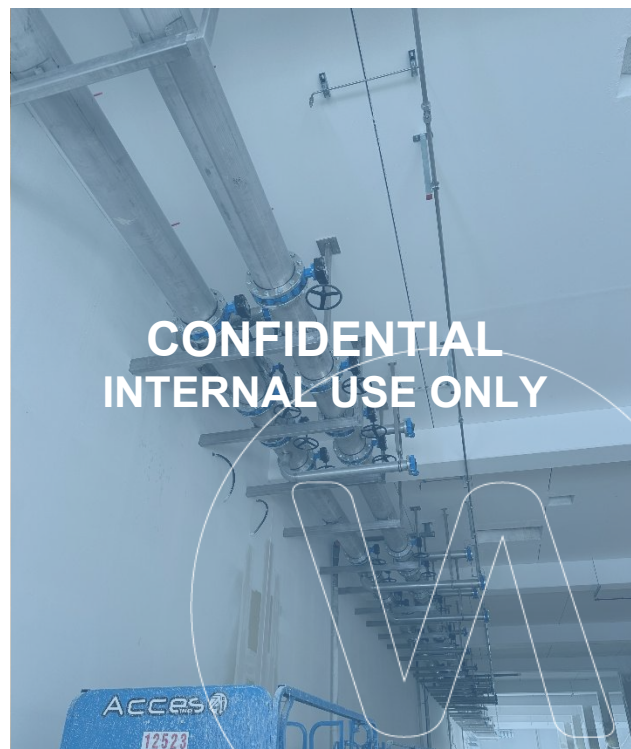

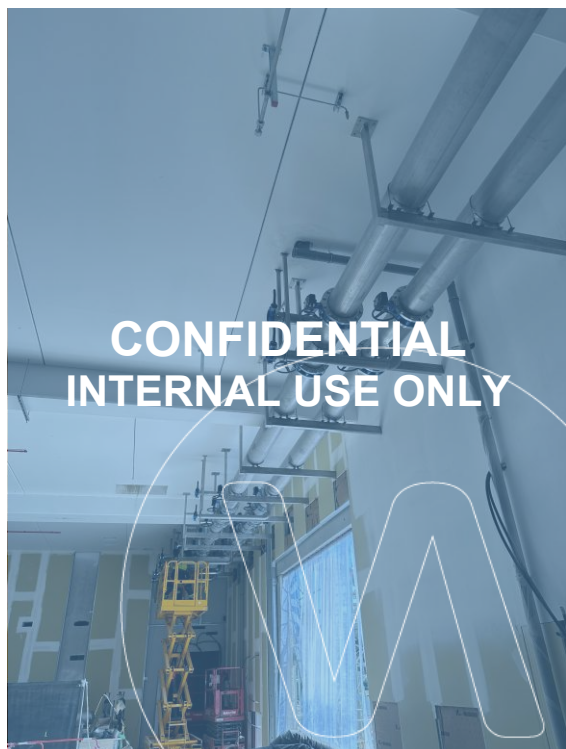

6. CONCLUSION

OPCORE DC3 is a showcase of **Valtria by Clauger France's** know-how and a starting point for new **challenges in the data center market**.
