

Added value to your projects

Valtria around the world:

In Barcelona office, we started at the same time as the Madrid office. Barcelona sold the first 4 works in the history of Valtria with a value of € 1.9M in total. We started with ten people in January 2014, the four partners from Barcelona plus 6 great collaborators, a secretary (Anna Andreo), a draughtsman (José Antonio Palazón), a construction technician (Francesc Gómez), a salesperson (Serafí Font), a maintenance manager (Alberto López) and a manager (Lluís Riquelme, no longer works at Valtria). We are currently close to 50 people working in Barcelona.

OFFICE:
Barcelona (Spain)
ADDRESS:
Carrer Torrent Tortuguer, 54
08210 Barberà del Vallès
Barcelona (Spain)

TEAM:
50 people

- **When and where was your office created?**

On February 1, 2014 we settled in the industrial unit that we currently occupy. Initially we adapted 200 m2 thinking that we would not occupy them in its whole for about two or three more years. In fact, at the end of the first year we were already fixing the 100 m2 that we had left in the same office floor. From the beginning, we are in an industrial warehouse in Barberà del Vallès, approximately 15 km north of Barcelona, in its industrial belt, with good communications to go to our clients' houses, who are mostly also in the industrial belt of Barcelona.

Added value to your projects

- **Where and with which clients do you work?**

Our clients are mainly from Catalonia, most of them are in the industrial belt of Barcelona and some more remote in the surroundings of Tarragona and Girona. We also operate in southern Spain, Murcia and Granada mainly, and some maintenance in Navarra. At the same time, we carry out works abroad: Algeria, France, Belgium, Ireland, Switzerland (CERN) and some other sites that have a potential future.

The pharmaceutical industry is majority, but also biological, cosmetic, plastic injection, veterinary research, etc.

- **Can you tell us any news of interest from your office or a local event in recent months?**

We plan to continue expanding the office, since we are currently at maximum occupation of the living space, it is a project for 2022.

- **Your ambition for the rest of 2021!**

In Valtria Barcelona every year we have several works with a lot of stress and little time to do them during July and August, and at the same time we drag the usual work of the whole year. Our ambition for the rest of 2021 is to recharge batteries during September, most of the staff take their vacations in September, in order to continue being at the highest level of commitment and efficiency, to continue giving the best service that we know to all our clients.
