

Added value to your projects

*Let's talk about **people**...*

**NAME:**

Andrea Rubio

**POSITION AND DELEGATION:**

Projectionist (Swiss – Finland, in Madrid)

**WHERE ARE YOU FROM?**

I was born in Úbeda, Jaén, but for work-related reasons my parents moved to Seville, where I grew up.

● **Why did you decide to join Valtria?**

I got to know Valtria as an external worker. From the first moment what caught my attention was the type of projects done and the very developed work methodology the company has. Another thing I valued a lot, which became decisive in me deciding to be part of Valtria, was the team I was working with, consisting of David, Ignacio and Elena, who are great professionals and made me feel part of the team despite not being part of the company yet. These were the main reasons why, when the opportunity of submitting by CV came up, I did not doubt it not even for a second.

● **What do you like about Valtria?**

I like Valtria because it is a company where work is done in teams, which allows you to contribute and, above all, learn from others. I also like that the company promotes training and drives the professional and personal evolution of its workers.

I would like to also highlight the good organisation, coordination and communication among teams, despite working from different offices.

● **And outside Valtria, what activities do you enjoy doing in your free time?**

My favourite hobby is reading. I try to make some time every day to read. At the moment in my hands I have *"The coast-to-coast murders"* by J. D. Baker. Another hobby is photography. At weekends I like to plan trips to take the camera out for a walk. Sometimes I also find time to build Lego and play video games.
