

Added value to your projects

*Let's talk about **people**...*

NAME:

Enrique Luján

POSITION AND DELEGATION:

Technician at Engineering Dept. (Madrid)

WHERE ARE YOU FROM?

I am from Madrid. I grew up in the Concepción-El Carmen neighbourhood (very close to the office in Madrid), although I currently live in the north of the city. Most of my family comes from Toledo.

● **Why did you decide to join Valtria?**

For the possibility of developing myself technically in a highly specialised industry and having a professional evolution within a company in the long-term.

● **What do you like about Valtria?**

The whole team's structure and organisation, the close relationship with managers and the good atmosphere with colleagues.

● **And outside Valtria, what activities do you enjoy doing in your free time?**

Outside Valtria I spend most of my time doing sports, to disconnect. I am a big tennis fan, a sport I do often. Besides doing sport, I go to sports events, listen to live music (Leiva concerts, just a little recommendation). Spending time with the family, small trips with friends, enjoying my city and making the most of my time. And of the time I spend in Valtria too.
