

Added value to your projects

Let's talk about people...

NAME:

Koldo Oyagüez

POSITION AND DELEGATION:

Head of Project (Basque Country)

WHERE ARE YOU FROM?

Portugalete (Biscay).

● **Why did you decide to join Valtria?**

I needed a change and fresh air and what a better place than a company that has always been a benchmark since I started working at Ingeclima. Everyone, suppliers, clients, and some colleagues always talked nicely of Valtria, so the opportunity came up and I bid on "getting out of the comfort zone" to grow professionally. I have never been afraid of challenges. On the contrary. And I am sure that with effort and excitement we can attain great things walking together. At the moment I face the challenge with humility, trying to learn and also to help the rest of my colleagues in anything I can contribute to.

● **What do you like about Valtria?**

I have not been here long, but from the first day I have felt welcome by everyone, from the company's management to the colleagues I am engaging with. I have seen that here you work as a team, essential to have a good work environment, and move projects forward. Another thing that caught my attention was that everything has its procedure, nothing is left to chance, and if there is something missing, you immediately get the support of Valtria departments. Also, you can give your opinion and have different ideas to everyone else. Things are talked through, shared and you feel listened. I came from a company where every project was a constant battle. No support from anyone except for two or three colleagues who always were there. You were left to fend for yourself to move a project forward. Any basic need you had you had to find the way yourself to cover it. Everyone was at their own thing because it was always about dividing and conquering. At Valtria things are different. From the first day I have been told the company is here to help you and find solutions and it is something to be grateful for. With time I will discover more things that will surely reinforce the idea that I made the right decision.

Added value to your projects

• **And outside Valtria, what activities do you enjoy doing in your free time?**

Well... With two kids there is little time left for me... We do everything as a family. We like travelling. We do it whenever we can. Once a year we try to get to know a European city and the rest of the year we take trips around Asturias, Leon, Cantabria, Navarra... Wherever suits us.

When I can, and it is not too often, I like to go to the mountain with my bike, go swimming and, every once in a while, I go on weekend trips with Maite and our old friends to disconnect and recharge batteries. Also a lunch here and there with the family, my parents, my siblings, my sister-in-law, my nieces, a cousin. I always end up cooking. Another passion of mine is the sea, walking on a rainy day along the coast and see how waves hit the rocks is priceless. That and of course our the team of our lives, Athletic Club, but I must confess Naroa and Oier have switched teams and now prefer Barça's jersey. Against Messi there is little you can do.
